

Radon is an invisible, odorless gas that is present in some homes. A radon test must be completed if a foster parent resides in Citrus, Hernando, Marion or Sumter Counties and must be updated every 5 years. The radon level must be 4.0pCi/L or lower. If a first test results in a reading above 4.0, this could be due to construction in the area or rainy weather. A second test should be done ASAP. If results continue to be high, the foster parent should consult with their Licensing Specialist.
